

Muhammad Ali

Software Engineer | Frontend Developer | Problem-Solving Enthusiast

Sylhet, Bangladesh | muhammadalibd121@email.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Professional Summary

Passionate self-taught programmer with strong frontend development skills (React, JavaScript, HTML/CSS, Tailwind) and a solid foundation in problem-solving and algorithms. Completed 20+ projects (personal + freelance), solved 700+ problems, and participated in 100+ programming contests. Quick learner, collaborative, and eager to contribute to a growing tech team while currently exploring backend technologies (Node.js, Express, MongoDB).

Skills

- Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, TypeScript
- Programming & Algorithms: C++, Data Structures, Competitive Programming
- Tools & Platforms: VSCode, Cursor, Git, GitHub, Netlify, Vercel, Firebase, Supabase
- Other: Responsive Design, Exploring AI-assisted coding tools (Cursor, ChatGPT)

Experience

Frontend Developer — Freelance Projects | 2023–Present

- Built the frontend for a university alumni website, implementing responsive layouts and interactive UI components using React and TailwindCSS.
- Developed frontend for a Dubai-based group of companies website, focusing on clean design, accessibility, and performance optimization.

Competitive Programmer — Various Platforms | 2024–Present

- Solved 700+ problems across Codeforces, CodeChef, LeetCode, and others.
- Participated in 100+ contests, strengthening algorithms and problem-solving skills.
- Achieved Pupil (1200+) rank on Codeforces and 2★ (1400+) rating on CodeChef.

Projects / Portfolio

- Portfolio Website: Built and deployed personal portfolio using React & TailwindCSS.
- Mini Projects: Created apps like quiz app, dashboard, and weather app to practice state management, API integration, and UI/UX design.

Open Source Contributions

- CodeYourFuture.io — Array Method Visualizer (HTML, CSS, JS): Improved UI, accessibility, SEO, and Lighthouse performance score.

Education

Secondary School Certificate (SSC) – Expected April 2026

Certifications & Courses

- CSE Fundamentals — Phitron (Foundational DSA & Competitive Programming)
- JavaScript (Basic) — HackerRank
- AI/ML Expert — Phitron (Currently Enrolled)

Achievements

- Solved 700+ problems and completed 100+ contests on competitive programming platforms.
- Pupil rank (Codeforces), 2★ rating (CodeChef), 3★ Problem Solving & C++ (HackerRank).
- Freelance experience building production-ready responsive websites for local and international clients.
